

Is Your Tech a Tool or a Teammate?

Case Study

Situation

BrightMove, an industry-agnostic recruitment software platform, has partnered with Hueman since 2010.

For more than 15 years, Hueman has partnered with BrightMove to power its recruiting efforts. As an RPO organization with multiple partnerships and client accounts, Hueman needed a flexible, scalable ATS that could support its recruiters across different programs while maintaining efficiency and consistency. Their top priorities: a simple user interface, easy customization, and a solution that could grow with their business.

Solution

Hueman implemented BrightMove's Applicant Tracking System (ATS) to **centralize recruiting operations and streamline workflows.**

With robust job syndication, easy configuration, and flexible custom workflows, BrightMove has allowed Hueman to tailor the platform to each partnership while maintaining one intuitive system. **Recruiters can move seamlessly between accounts using BrightMove, significantly reducing ramp-up time and enabling faster hiring.**

"I love BrightMove for the simplicity and power of the system. It's very user friendly and offers a lot of functionality to streamline processes."

- **Dina DeMarco**

Division President | Hueman

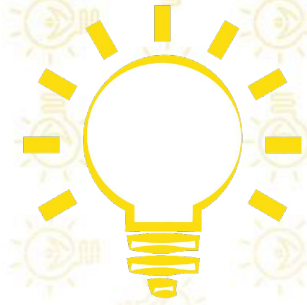

"As an RPO organization, I love the customization that you can do for different partnerships and child instances. The ability to create custom workflows and templates is nice."

- **Pete Hannigan**

Vice President | Hueman

Results

- 15+ years of trusted partnership and platform growth
- Faster recruiter ramp-up across multiple client programs
- Reduced training time thanks to a user-friendly interface
- Streamlined workflows through customizable templates and configurations
- Cost savings through an affordable, scalable ATS solution
